- III. Review Project Scope and Timeline (8 minutes)
- IV. Review Transportation System Plan (TSP) Recommended Focus Areas (2 minutes)
- V. Review TSP Policies and Actions (10 minutes)
- VI. Discuss Code Change Parameters (10 minutes)
- VII. Question and Answer (10 minutes)
- VIII. Next Steps (5 minutes)

**Background:**

The Springfield Transportation System Plan (TSP) was jointly adopted by the City of Springfield and Lane County in March, 2014. The City of Springfield completed a planning process to look at how the transportation system is currently used and how it should change to meet the long-term (20-year) needs of Springfield's residents, businesses, and visitors.

Through coordination with community members and affected public agencies, the City of Springfield developed a TSP for improvements of all modes of transportation in Springfield, including the roadway, bicycle and pedestrian, transit, and rail networks. The plan also includes a transportation improvement and financing plan. Now that the TSP is adopted, the Springfield Development Code (SDC) must be updated to fully implement the TSP.

The Stakeholder Sounding Board consists of a broad variety of stakeholders that represent different interests in Springfield. The sounding board will advise City Staff on code changes that should occur to implement the policies and actions that were adopted in the Springfield Transportation System Plan.
