

PRESERVATION & REPAIR BACKLOG LIST

If measure 20-252 passes, it would increase the local fuel tax rate from 3 cent per gallon to 6 cents per gallon. A 3 cent local fuel tax increase would raise an additional \$1.1 million each year and would go toward street preservation and repair projects only. Current revenue is not enough to pay for the backlog of street preservation and repair projects that total approximately \$30 million.

This backlog list of street preservation and repair projects was presented to Springfield City Council as part of the 2015 Springfield Streets Condition report, using 2014 construction costs. Items listed may be adjusted based on the results of future street system assessments. Only first year local street projects are available and listed at this time. If measure 20-252 passes, an additional 4 to 5 miles of local street projects would be identified each year as part of an annual report that would document projects funded. The first full construction season would be 2018. Additional information about the proposed local fuel tax increase is available at springfield-or.gov under the Proposed Fuel Tax Increase link.
