

WANTED

(Dead, Not Alive)

SCOTCH

BROOM

(a.k.a. *Cytisus scoparius*)

This weedy, seedy, desperado was last seen growing in Springfield

CRIMES COMMITTED:

- ◆ Costing a bundle for taxpayers to control
- ◆ Choking and the deliberate takeover of native plants
- ◆ Stealing land, homes, water, and food from wildlife
- ◆ Invading open lands, roadsides, waterways, and recreation areas
- ◆ Wreaking havoc and mayhem on unsuspecting ecosystems

DISTINGUISHING FEATURES:

- ◆ A perennial shrub of the pea family
- ◆ Grows 3 to 10 feet in height
- ◆ Green branches appear to be leaf-less or have small leaves
- ◆ Flowers are yellow with a brownish black seedpod

CONTROL METHODS:

- ◆ First year plants are easy to pull
- ◆ Dispose of all plant material after pulling
- ◆ Plant will resprout unless entire root is removed
- ◆ Remove flowers to prevent seeds from spreading

JOIN THE INVASIVE-WEED PATROL:

- ◆ Notify your neighbors when you spot this weed on their land
- ◆ Remove all weed seeds from clothing, shoes, pets, camping gear, and tires
- ◆ Report any sightings on public lands to your local land managers

REWARD

Healthy waterways and diverse ecosystems on your public lands
