

Mill Street Reconstruction Project March 2024

The design for the Mill Street Reconstruction Project is wrapping up and is expected to be completed this spring The project is expected to go to bid in May, and the contractor will be selected in July. The right of way process is underway, and all impacted property owners have been

contacted by ODOT. Negotiations for the temporary construction should be completed in April. If you have not been contacted by ODOT that means your property will not be impacted by the project. The utility relocation designs are complete and utility companies will begin required relocation starting in March. The general timeline is provided below and additional ation will be shared as it becomes available.

March 2024
