

Frequently Asked Questions

Middle Housing Legislation - Oregon House Bill 2001

What is Middle Housing?

Middle Housing is defined by the new Oregon legislation as duplexes, triplexes, fourplexes, cottage clusters, and townhouses. These housing types are intended to provide additional housing opportunities that fit along the spectrum of housing choice between detached single unit homes and multi-unit apartment buildings.

What is the new Middle Housing Legislation?

In June of 2019, the Oregon State Legislature passed new middle housing laws (HB 2001) intended to provide more housing opportunities for a variety of housing types in traditionally single unit home neighborhoods, and to increase the overall housing supply in and around cities. The new laws require the City of Springfield to adopt code amendments to allow:

- A duplex on each lot or parcel:
 - That is zoned for residential use; and
 - On which the City's current land use regulations allows development of a detached single-unit dwelling.
- Duplexes, triplexes, fourplexes, cottage clusters, and townhouses in areas zoned for residential use that allow for development of detached single unit homes.

The City may regulate siting and design of the middle housing provided that the regulations do not, individually or cumulatively, discourage the development of all middle housing types permitted in the area through unreasonable costs or delay.

Do the new middle housing laws ban single unit homes?

The new law specifically does not prohibit single-unit homes. Single-unit homes will continue to be allowed in the low residential district (LDR zones). The HB 2001 legislation is intended to re-legalize more housing opportunities for a variety of housing types. Historically, duplexes, triplexes, and small housing units were allowed and built alongside single unit homes in residential neighborhoods. Over time the opportunity to build a variety of housing options was limited or removed.

Will development standards for middle housing change?

With the implementation of the middle housing legislation development standards are not allowed to individually or cumulatively discourage the development of all middle housing types through unreasonable costs or delay. New or revised development standards could include maximum building height limits, setbacks, lot coverage and other standards similar to existing standards that are in place today.

When will new middle housing development be allowed?

The City of Springfield started the Development Code Update project in September of 2018 and was already in the early stages of code revisions when the new middle housing laws were passed in June of 2019.

Continued on other side.

The first phase of the Development Code Update project is working on revisions to the housing code sections.

The Springfield City Council gave direction to staff to incorporate the middle housing requirements into Phase 1 of the project which is considering housing code amendments. These amendments are anticipated to be in place mid-2022. After formal adoption, the new regulations will be able to be utilized for new middle housing development.

What about single unit home conversions?

Implementation of the middle housing legislation will allow conversion of existing single unit homes into duplex, triplex, or fourplex units. Other standards such as building code, fire code, and System Development Charges (SDC's) will continue to apply.

What changes to Accessory Dwelling Unit (ADU) standards are needed?

The new middle housing laws require cities to allow ADU's without requiring additional onsite parking or requiring owner occupancy of one of the units. The City of Springfield must modify its existing code provisions for ADU's to not require an additional onsite parking space. As of January 1, 2020 the City is no longer requiring an additional onsite parking space for ADU's.

Can new middle housing units be divided onto their own lots?

The State of Oregon just adopted new laws (Senate Bill 458) that requires Springfield to allow division of middle housing units onto their own lots. There will be requirements for utility infrastructure and to ensure meeting necessary building code requirements. This new process will be part of the new Development Code language.

What is the process for adopting new land use regulations?

The Springfield City Council must initiate changes to the City's development code, which has already taken place for the Development Code Update project which also incorporates implementation of the middle housing laws. The City has completed a public involvement process including a virtual open house and online survey to collect feedback on possible code changes. A draft of proposed code changes will now be presented to the Springfield Planning Commission on January 4, 2022 at a public hearing. The Planning Commission will collect feedback from the community on the proposed code changes during the hearing. After reviewing feedback from the community and the proposed changes to the development code, the Planning Commission will make a recommendation to the City Council. The City Council will then hold a second public hearing process, taking any additional testimony from the public, and then make a final decision on an ordinance to adopt the changes. This process for the Phase 1 - Housing Phase of the Development Code Update project is anticipated to be complete by June 2022, as the City needs to comply with the HB 2001 legislation by this deadline.

How do I get involved or stay informed?

You can visit the web page for the Development Code Update project at:
