

Library Remodel Snap Shots

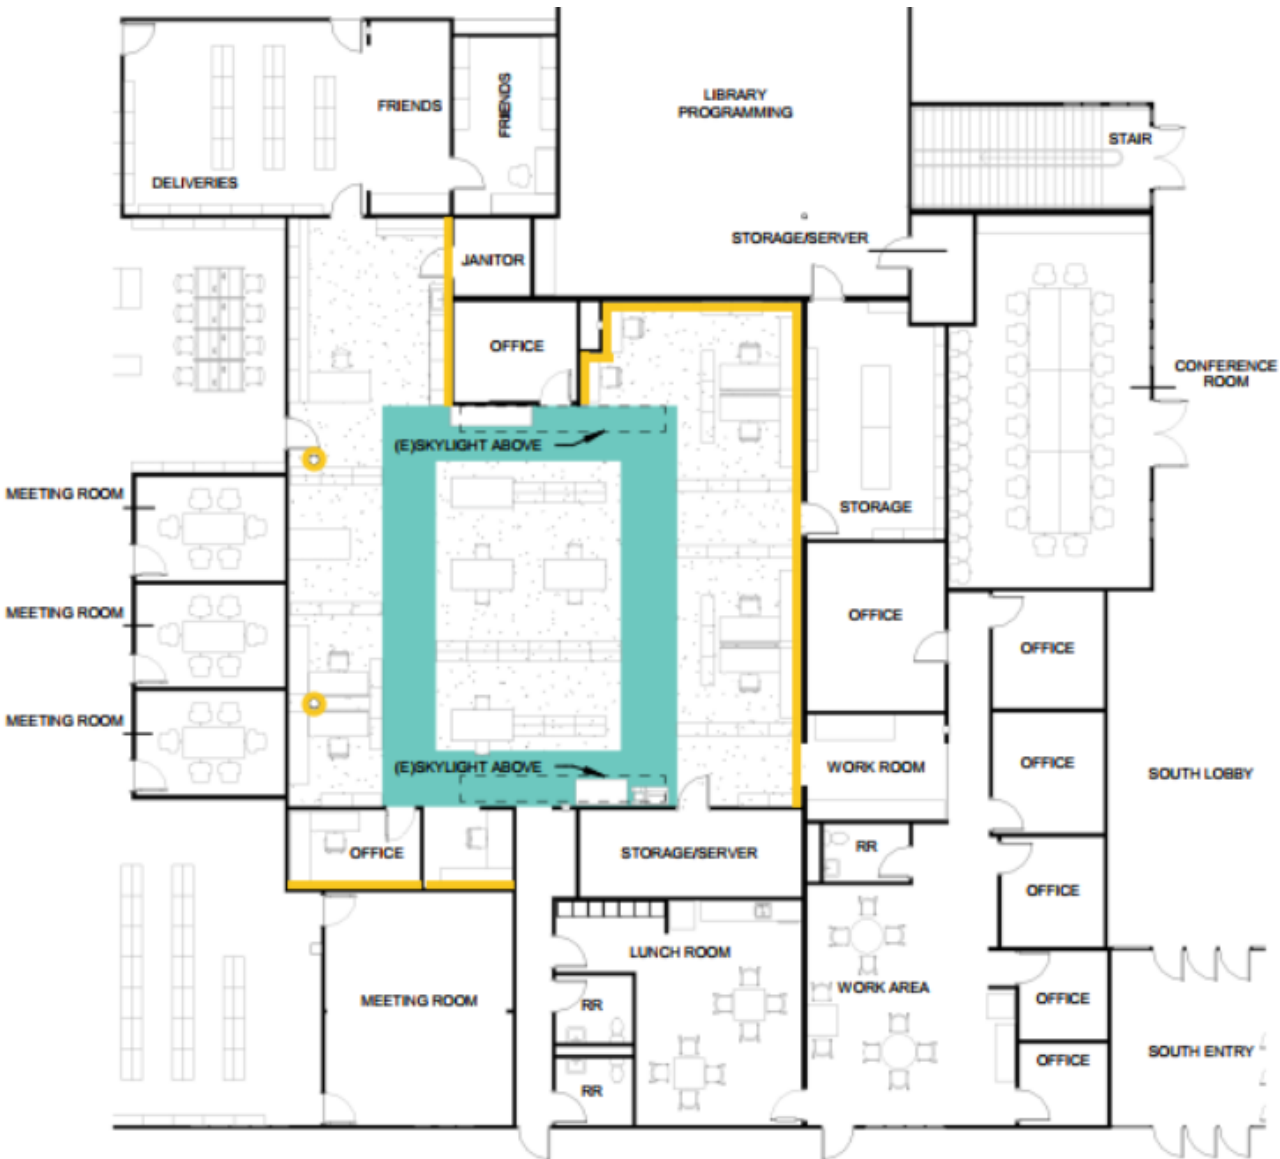

Overview that shows the location of the new service desk area and additional study work rooms

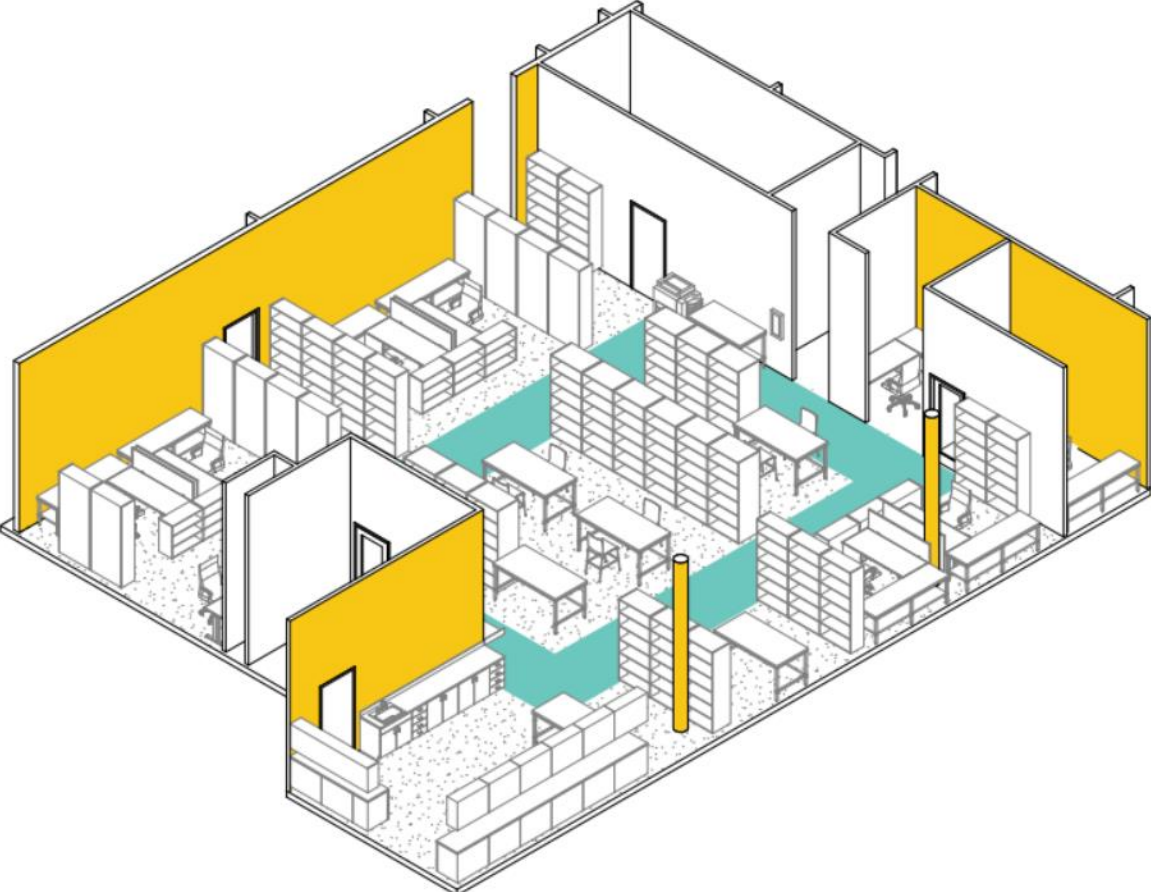

Teen Area. This layout may change a little, but it gives a general idea of what the space will look like. This will be the space where the movies, music and audio books are located now. The media will be relocated to the current teen space.

This is an overview of the **back workroom and office spaces**. The area outlined with the accent carpet will be the dedicated work area for processing materials, with workspaces all around. Some staff will move into the vacated City Manager's Office to the right in this drawing. A new conference room is being added to take some of the pressure off the Library Meeting Room so that this can be used primarily for library programming.

This is the 3D view of the back work area.
