Jasper Road School Crossing safety upgrades at Filbert Lane

Dear Resident:

You are receiving this letter to provide you with more information and updates regarding the upcoming school crossing project at Jasper Road and Filbert Lane. The City is currently finalizing the remaining design details and would like to share specific location information regarding the ramp improvements and the Rectangular Rapid Flashing Beacon (RRFB) locations within the City right-of-way (ROW) for the Jasper/Filbert crossing.

The goal of the projects is to provide safer crossing locations for the students and other members of the community along Jasper Road. Each RRFB crossing signal will include tactile and voice audible pushbuttons for activation and double-sided flashers to increase the safety potential.

This project along with the Jasper/ Dondea Street crossings should be going out to bid in the next few months. Construction of each RRFB will be done during times when school is not in session. The City will send another mailer before construction begins.

If you have any questions or comments regarding the project, please contact City staff or visit our project webpage.
