Jasper Road School Crossing safety upgrades at Filbert Lane and Dondea Street

Dear Resident:

You are receiving this letter to provide you with information and updates regarding the upcoming school crossing projects at Jasper Road/ Filbert Lane and Jasper Road/ Dondea Street. The goal of these projects is to provide safer crossing locations for the students and other members of the community who walk or bike along Jasper Road.

The projects consist of ramp improvements and installation of RRFB (Rectangular Rapid Flashing Beacon) crossing signals. Each RRFB crossing signal will include voice audible pushbuttons for activation and double-sided flashers to increase the safety potential.

The City is finalizing the design for both crossings and should be going out to bid in a few months. Construction of each RRFB will be done during times when school is not in session, and we will send another mailer before construction begins.

If you have any questions or comments regarding the project, please contact City staff.
