

## Mill Street Reconstruction Project Update

225 Fifth Street  
Springfield, OR 97477

See reverse for more details...

## Mill Street Reconstruction Project: South A to Centennial Boulevard

The Mill Street Reconstruction Project includes new concrete pavement, sidewalk and driveway reconstruction, and ADA compliant curb ramps.

The construction of these elements may require a temporary construction easement on your property.

If you have any questions or comments regarding the project, please contact City staff.

Kristi Krueger, capital engineering manager  
541.726.4584 or kkrueger@springfield-or.gov

Work is progressing on the Mill Street Reconstruction Project and we look forward to construction which is planned to begin in 2024. Since your property is on Mill Street, we're sending this postcard to inform you that the Oregon Department of Transportation (ODOT) will be sending out more information on temporary construction easements in the coming weeks.

A **temporary easement** provides a temporary right to use the property of another for specific uses and for a specific period of time. The purpose of these easements is to provide space for the contractor to construct new sidewalks and driveway connections as part of the Mill Street Project. All new sidewalks and ADA curb ramps will be constructed within the existing City right of way.

Temporary activities within the easement will likely include but are not limited to foot traffic, construction equipment, concrete formwork, clearing, grubbing, and re-seeding. **Construction is planned to begin in Summer of 2024 and will extend through the summer of 2025**, however, the actual construction period of use of the easement is not to exceed a period of thirty consecutive days.

Thank you for your patience and understanding as we work to improve Mill Street.
