

Mill Street Reconstruction Project September 2024

Work has started on the Mill Street Reconstruction Project. Mill Street is now restricted to one-way northbound traffic between Main Street and Centennial Boulevard until May 1, 2025. **For those walking, rolling, biking, or driving east on West D Street, please use the detour via Kelly Blvd. and West E Street to safely cross Mill Street.**

Northbound vehicle traffic is now shifted to the west side of the street and a detour is in place for southbound traffic to go around the work zone on Pioneer Parkway West. Parking is not permitted on Mill Street during construction. Pedestrian crossings on Mill St. are limited and marked with detours.

As the project continues in 2025, northbound traffic will be shifted to the east side of the street. Work is scheduled to be completed by the end of 2025. Additional updates will be sent throughout the project. Thank you for your patience and understanding as we work to improve Mill Street.

The project includes:

- New concrete pavement
- Sidewalk and driveway reconstruction
- ADA-compliant curb ramps
- Stormwater and wastewater improvements
- Street lighting improvements
- Traffic calming
- Addition of bike facilities

Staff will provide updates on the Mill St. reconstruction project webpage <https://bit.ly/MillStreetReconstruction>.

We will also send out electronic updates through email, if you were forwarded this email and want to receive these updates, please sign up using this link: <https://bit.ly/MillStreetReconstructionEMAIL>.
